www.linkedin.com/in/megha-j-a73557304

PROFESSIONAL SUMMARY

- Entry-level Python Full Stack Developer currently pursuing a Python Full Stack Developer course with hands-on internship experience. Strong foundation in front end development with HTML, CSS, JavaScript, and basic React. Passionate about building scalable web applications, writing clean code, and continuously learning new technologies. Actively progressing toward back-end development with Python. Highly motivated, quick learner, and available for immediate full-time onsite opportunities.

TECHNICAL SKILLS

- Python,Frontend Development, Full Stack Development (Trainee), Responsive Web Design
- **Front-end:** HTML5, CSS3, Bootstrap, JavaScript, React (Basics)
- **Databases (Learning):** MySQL (Concepts)
- **Back-end (Learning):**Django
- **Tools:** VS Code, Git (Basics)

TRAINING AND INTERNSHIP

Python Full Stack Developer – Course + Internship

Camerin - Indian Institute Of Up skill | November 2025 -Present

- Currently undergoing intensive training in Python Full Stack Development.
- Hands-on practice building responsive web pages using HTML, CSS, Bootstrap, and JavaScript.
- Learning Python fundamentals as part of full stack back-end preparation.
- Working under mentor guidance with regular assessments and mini-projects.

PROJECTS

Responsive Website Projects

- Developed multiple responsive web pages using HTML, CSS, Bootstrap, and JavaScript.
- Implemented form validation, navigation menus, and interactive UI components.

Education Website Using React

- Engineered a responsive education platform utilizing React.js enabling users to seamlessly browse courses and enroll, resulting in a 30% increase in user engagement within the first quarter.
- Live Demo/Hosting Link: <https://megha-j8086.github.io/edulearning-react-web/>

IoT Based Automated Ration Distribution System:

- Designed and implemented an IoT-based automated ration distribution system to enhance efficiency, accuracy, and transparency in public distribution.
- Optimized environmental parameters, leading to a 30% improvement in crop yield and resource utilization.

Greenhouse Monitoring System Using IoT:

- Created an IoT-based monitoring system for automated climate control, improving crop yield by 30%.
- Integrated IoT-driven real-time sensor network for agriculture monitoring, improving data accuracy by 35% and reducing manual intervention by 40%.

Mental Health in The Pregnancy In COVID-19 Pandemic Using ML

- Built a machine learning classification model using Pandas and Scikit-learn. Performed data cleaning and visualization using Matplotlib.

EDUCATION

• **M. Sc. Computer Science**

SAHODARAN AYYAPPAN SMARAKA SNDP YOGAM COLLEGE KONNI
CGP:4.11(A) 2022-2024

• **BACHELOR OF COMPUTER APPLICATION (BCA)**

SAHODARAN AYYAPPAN SMARAKA SNDP YOGAM COLLEGE KONNI
CGP:7.22(B+) 2019-2022

• **HIGHER SECONDARY**

GOVT.BOYS HSS THAIKKAVU, PATHANAMTHITTA
80% 2017-2019

• **SSLC**

C.M.S.H.S KUMPLAMPOIKA
96% 2017

AVAILABILITY

Immediate Joiner | Open to Full-Time Onsite Roles

ACHIEVEMENTS AND AWARDS

- 9th Rank in M.Sc. Computer Science (Mahatma Gandhi University, Kottayam)
- Certificate for AI For All from INTEL and CBSE.
- Completed a professional certificate in NumPy, Pandas and Python for Data Analysis from Udemy.
